Group 13: Charles Chatwin, Michael Hartzell, Kristoffer Schindele, Logan Brewer
Utility-DC
https://github.com/TheSeesaw/CS386-Utility-DC.git
Deliverable 3.1
CS386 Software Engineering
Spring Term, 3/7/2017
Professor Marco Gerosa

Instructions: Download the files from GitHub (link in header); Run in a java environment.
Link to Trello: https://trello.com/b/UGLjS9Av

These are written in Java. We chose to use Java because of two reasons; one, it is our fallback for JavaScript (making the program run online), and it is very similar to it. Two, Java is a language we all more-or-less are comfortable with.

Some adopted technologies around classes that have been created before.

Group participation:

Charles Chatwin	Created the document, began collaboration with other members, Added A character's rough draft and an ability rough draft to the github. Created some elements on the Trello 'to be done' tab. Added the writeup.
Michael Hartzell	Worked on Login/User source code
Kristoffer Schindele	(was out sick)
Logan Brewer	Worked on Map source code
